## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 11-16, drawn to fabric care compositions.

Group II, claim(s) 17-19, drawn to fabric care methods.

Group III, claim(s) 20 and 21, drawn to a fabric care kit.

Group IV, claim(s) 22, drawn to fabric care methods.

Group V, claim(s) 23, drawn to a fabric care kit.

2. The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Any feature which unites the invention fails to make a contribution over the prior art because Group II lacks an inventive step in view of WO 98/04772.

3. During a telephone conversation with Mr. Jason Camp on April 17, 2003 a provisional election was made with traverse to prosecute the invention of Group II, claims 17-19. Affirmation of this election must be made by applicant in replying to this Office action. Claims 1-16 and 20-23 withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

***Information Disclosure Statement***

5. The references which were submitted with the PCT Search Report have been considered.

***Claim Rejections - 35 USC § 112***

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 17-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The compositions are claimed as being "essentially free" of starch and silicones. However, the specification lacks guidance regarding what maximum amounts of starch and silicone can be present with the compositions still being considered "essentially free" of these materials. Accordingly, the metes and bounds of these claims cannot be determined.

***Claim Rejections - 35 USC § 103***

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

10. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

11. Claims 17-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 98/04772. The reference discloses fabric care compositions which reduce fabric

creasing. The compositions may comprise a fabric softening compound as described on pp. 8-10. Amounts of fabric softener are not specifically disclosed, but compositions comprising 0.05% to 0.5% are exemplified. Addition of silicone is optional. Accordingly, it would be obvious not to include silicone. It is beneficial for spray products to comprise ethanol, isopropanol or a glycol (p. 13, lines 28-30). Discovery of the solvation-effective amount of a solvent amounts to routine experimentation and would be obvious to do. The examiner notes that a number of the materials disclosed by applicant as being suitable asymmetric solvents are glycols. Addition of hydrotropes is disclosed at p. 14, line 21. As hydrotropes are used to solubilized insoluble substances in water, this amounts to an implicit teaching of the utility of one-phase (clear) compositions. Spraying and ironing after laundering is disclosed in the examples. This reference differs from the claimed subject matter in that it does not disclose a composition which reads on applicant's claims with sufficient specificity to constitute anticipation.

It would have been obvious at the time the invention was made to make such a composition, because this reference teaches that all of the ingredients recited by applicants are suitable for inclusion in a surfactant composition. The person of ordinary skill in the surfactant art would expect the recited compositions to have properties similar to those compositions which are exemplified, absent a showing to the contrary.

In the case where the claimed ranges overlap or lie inside ranges disclosed by the prior art, a *prima facie* case of obviousness exists. *In re Wertheim*, 541 F.2d 257, 191 USPQ 90 (CCPA 1976); *In re Woodruff*, 919 F.2d 1575, 16 USPQ2d 1934 (Fed Cir. 1990).

12. Any prior art made of record and not relied upon is of interest and is considered pertinent to applicant's disclosure.

13. Any inquiry concerning this communication or earlier communications from the examiner should be directed to the examiner, Dr. John R. Hardee, whose telephone number is (703) 305-5599.
